Objective

Aspiring Data Analyst specializing in business intelligence and AI-driven applications with hands-on project experience in analytics-based and automation systems. Skilled in applying analytical and technical approaches to support data-driven decision-making and reporting.

Achievements

- Actively worked on AI and Full Stack mini projects for practical learning.
- Attempted GATE CSE Exam to strengthen core computer science knowledge.

Experience

Full Stack Development Intern

- Developed web applications using Python Django and REST APIs.
- Designed and implemented database schemas using MySQL.
- Built backend modules with proper validation and authentication.
- Worked on frontend integration and ensured smooth data flow between UI and backend.
- Improved SQL query performance using joins, indexing, and filtering.
- Participated in debugging, testing, and project documentation.

Projects

AI-Based FAQ Chatbot with Voice Assistance

- Developed an AI-based chatbot system that answers frequently asked questions automatically.
- Integrated voice input (Speech-to-Text) and voice output (Text-to-Speech) for better interaction.
- Implemented NLP-based matching to provide accurate responses.
- Built backend using Django framework and stored training data in MySQL database.
- Designed an admin panel to manage questions and answers effectively.

Budget Travel Planner (Smart Travel Packing Assistant)

- Developed a travel planning web application that helps users estimate travel budget and packing needs.
- Provided destination-based budget calculation including travel, food, stay, and emergency expenses.
- Generated packing suggestions based on trip duration, weather, and location.
- Built the system using Python Django, MySQL, and frontend technologies.
- Designed the application to support all Indian states with customized recommendations.

Education

B.Tech — Computer Science and Engineering

RGUKT Basar - Expected 2027

Skills

Excel Analytics	MS Excel
SQL & Data Querying	Queries, Joins, Filtering, Group By
Backend & Frameworks	Django, REST API
Data Warehousing	SQL Server, MySQL, Database Schema, Data Storage
Programming	C, Python, HTML
AI Workflow Tools	NLP Basics, AI Chatbot Development

Certifications

- Coursera — Full Stack Development
- Coursera — Python

Strengths

Problem-solving, quick learner, effective communication, teamwork, time management, adaptability, logical thinking.

Hobbies

Analytics dashboards, hackathons, watching movies, listening to music, traveling, exploring new technologies.

Personal Details

Date of Birth	9th July 2005
Gender	Male
Location	Telangana, India
Languages	English, Telugu, Hindi
Nationality	Indian
Marital Status	Single
